

RISK ASSESSMENT

The safety of your consumers is vital to fulfilling your brand promise. Our industry-leading expertise and trusted experts ensure your products are safe and of the highest quality.

Quality and safety are vital for every product you produce or market. That's why we continue to add to our industry-leading analytical and risk assessment services to expand our support for your quality program. You need to ensure the purity and quality of your product. Current global food regulations, including the US Food Safety Modernization Act (FSMA), increase emphasis on contaminants and residue analysis as part of a food safety plan. You want a partner that can identify contaminants to protect product integrity and deliver on your brand promise.

Why Us? We understand that your contaminant testing needs are unique. When you partner with Eurofins Food Integrity & Innovation, our expertise in testing a wide variety of matrices delivers a distinct advantage to you which reaches far beyond the challenges of routine testing. Our vast experience with challenging matrices, including but not limited to botanicals and teas, brings with it a peace of mind for you.

We understand that a relevant and robust ingredient or supplier verification program is key to your business. Our extensive knowledge of regulations and trends in contaminants can be immediately put to your advantage to assist in developing and maintaining a program that meets your needs while protecting your brand.

Our Solutions:

- Chemical risk assessment
- Supplier verification programs
- Comprehensive multi-residue pesticide screens (300 or 500 compounds)
- Heavy metals testing
- Prop 65 testing for many contaminants including lead, arsenic, cadmium, glyphosate
